

## Thank you for buying my G2A Method!

With this method you will be able to get anything from <https://www.g2a.com/> completely for free. This exploit works for literally any product that is available for sale on G2A including: **Gift-cards**, **Activation Keys** (for games and software) and **Hardware** as well.

### How it works?

It's really simple. We will use a **Tampermonkey** script which changes our browser's timezone whenever we make a new order on g2a. As soon as we get redirected to the payment page, our timezone will change - which will result in our order getting marked as "Expired" on Bitbay's side, **but NOT on g2a's side**. So, if we pay for the products - our order will get processed and delivered by g2a anyway, but **the money will get INSTANTLY refunded to our wallet by Bitbay**

### Short summary of the process:

1. Install a Google Chrome extension named "Tampermonkey"
2. Install a Script that changes your browser's timezone after making an order on g2a
3. Create a new order on g2a and pay for the products by Bitcoin.
4. Claim your products. (Order will be successfully processed by g2a)
5. Wait a few minutes for a refund from Bitbay. (Bitbay is a Bitcoin payment processor for g2a. They will refund your money, because the order is marked as "Expired" on their side due to the timezone conflict.)

### Important - Please read this:

Keep in mind that Bitbay will refund your "Expired" order only if it's above **0.005 BTC**. **Any lower amount is not prioritized and will require you to contact their support** to get a refund, which will result in your request getting rejected, as they will find out that the order was processed by g2a. **If you use any amount higher than 0.005 BTC, it will get automatically refunded without problems.**

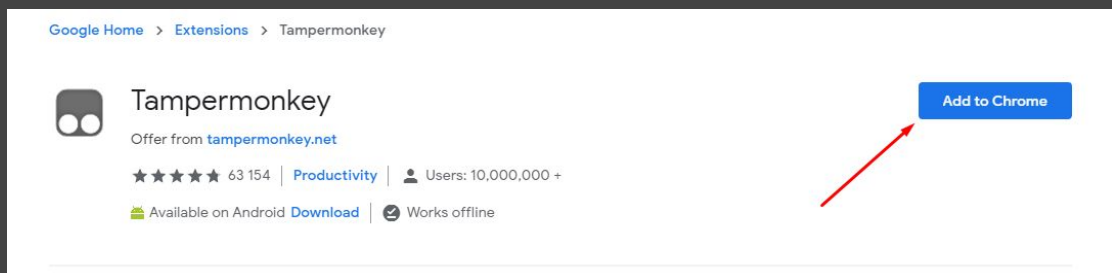

Basically you have to add to your cart items that are worth at least 0.005 BTC, it could be one or multiple products - doesn't matter.

There are absolutely no limits on the maximum worth. I personally purchased 5 x \$100 Amazon Gift-cards in one order, and it was instantly refunded to mywallet with no issues.

# Okay, let's begin!
